

Table 2. Comparisons of the degree of pain in three coil placements during magnetic stimulation					
	Coil placement			<i>P</i> value	Multiple comparison
	point (1)	point (2)	point (3)		
Degree of pain	3.3 ± 0.9	2.2 ± 0.8	2.7 ± 0.6	< 0.05	point (2) < point (1)
Evaluated by the face scale after the three measurements.					
The data shown are the mean ± SD.
